

LETTER OF APPRECIATION

FOR

DOHATEC

With great satisfaction and contentment I would like to thank your good offices for the remarkable contribution of your company to the 'VOTER LIST WITH PHOTOGRAPH AND NATIONAL ID CARD' project. As software development and data management partner of Bangladesh Army's team; your company's contribution was significant and laudable. Your biometric matching software from Neurotechnologija has been used extensively to match all 80 million voters and has proven to be very robust and effective. We would also like to acknowledge the quality of your voter enrollment software which was developed in collaboration with Bangladesh Army in February-March 2007. Your technicians and software engineers had worked relentlessly with our team to achieve what was required of the project. Their knowledge, skill, working methodology, contribution and performance was of the highest standard.

I do once again affirm you that your company has displayed high standard of quality performance in this project without much remuneration and financial gain. Through this project you have displayed high level of dedication at the time of national need and technological advancement. This is a testimony of your company's good practices, corporate social responsibility and long lasting reputation. I wish and pray for similar success in your future endeavor.

MD SHAFIQUL ISLAM
Major General
Military Secretary and Chief Coordinator of
Voter List with Photograph & National ID Project
Bangladesh Army
Dhaka Cantonment
